PROFESSIONAL EXPERIENCE – CENTRAL INTELLIGENCE AGENCY

Project Manager, Chief Information Officer 2012-2013

- CIO Project Manager assigned to manage operational technology requirements for the National Clandestine Service. Effected dramatic process improvements on an annual survey of NCS technology needs, including a marketing campaign within NCS. Developed expertise on operational technologies and served as lead on operational requirements topics.

Project Manager, COTR, Chief Information Officer 2009-2012

- Lead Project Manager, COTR for a CIO/Applications Services organization which provided over 1,000 IT contractors to hundreds of Intelligence Community (IC) projects. Managed four large contracts which executed hundreds of millions annually. Determined award fees and provided award fee briefings. Maintained excellent working relationships with four contractor program management offices. Wrote Requests for Information (RFI) and contributed to Requests for Proposal (RFP) and other acquisition documents for two competitions. Managed and developed two PM/COTRs on my team.

Mission Manager, Open Source Center 2007-2009

- Mission manager for a complex IT system designed to collect and store bulk data from the Internet in response to US intelligence requirements. Analyzed system performance against user requirements and rewrote the

user requirements, which facilitated system delivery. Oversaw user acceptance testing, system training, system marketing, and writing of user policies. Managed a team of Government and Federally Funded Research Development Consortium (FFRDC) subject matter experts.

Customer Center Manager, Open Source Center 2004-2007

- Improved customer service in OSC by leading the outsourcing of the Customer Center to a commercial vendor. Oversaw the project from acquisition plan to contract award and beyond. Articulated a vision for customer service in OSC and delegated appropriately to various experts. Oversaw the creation of the acquisition team – Technical Management Evaluation Team (TMET), Cost, Past Performance, and Security. Chaired the TMET and briefed the award decision to the Source Selection Evaluation Board (SSEB). Defended my vision and the award decision to high level audiences. Oversaw the transition to the new contract and the execution of its first critical deliverables.
- Served as mission manager for Opensource.gov, the Intelligence Community's (IC) premier dissemination platform for Open Source intelligence. More than doubled the number of users by improving system usability and content delivery capabilities. Drove requirements for a system with an annual development budget in the multi millions. Fostered an excellent relationship with the prime contractor.

Agency Certifications, Awards

CIA Project Manager Level 2, COTR Level 3.
Exceptional Performance Awards (16)

Overseas Service, Open Source Center/FBIS

Over nine years serving in Europe, the Middle East, Far East and Latin America while managing the collection of open source intelligence.
